Neuropathy analyzer-vibration perception threshold + temperature perception threshold

Technical Specifications

1. Combined digital vibration perception threshold and vibration perception threshold detector- should be capable of measurement of warm, cool and heat pain thermal sensory thresholds as well as of vibration perception threshold (VPT).
2. Should have Digital 0-50 volts vibration output range.
3. Should have 1- 50° C calibrated temperature output range.
4. Should be provided with remote keypad for easy operation
5. Should be capable of automatic interpretation based on set values
6. Should be PC enabled with software support
7. Patient report storage and export options should be available
8. Manufacturer / supplier should have ISO 13485 certificate for quality standard.
9. Should come with extended warranty / maintenance contract for at least 5 years
